

EQUUS SURVIVAL TRUST

2011 EQUINE CONSERVATION LIST

The breeds listed below are those that are known to the Trust to have a viable breeding population *and* a presence in North America. Category status is calculated only in part by global breeding populations.

Critical/Nearly Extinct	Fewer than 100 active breeding mares
Critical	100 - 300 active adult breeding mares
Threatened	300 - 500 active adult breeding mares
Vulnerable	500 – 1500 active adult breeding mares
At Risk	1500 – 3000 active adult breeding mares
Watch	3000 – 5000 active adult breeding mares

Recovering - Previously listed. Exceeds *Watch* category but may need monitoring
Study - Breeds of genetic interest that require additional study for consideration.
