

EQUUS SURVIVAL TRUST - ACTION ALERT
Two Breeds ADDED to 2017 EST STUDY CATEGORY
July 6, 2017

CALIFORNIA VAQUERO MARE

OJIBWE HORSE

Two new studies are currently underway to research the history and determine the genetic heritage of the California Vaquero Horse and the Ojibwe (aka LacLa Croix).

The Equus Survival Trust will work with the breeders & owners and associated organizations of both these breeds in the coming months, reviewing histories, descriptions, photographs, and DNA evidence to determine if they qualify as permanent EST breeds and what EST can do to help in their preservation.

For more information on these and other equine conservation efforts contact:

Victoria Tollman, Executive Director
